

ALUMINIUM HOOK - CARBINE

(51200-51201)

USE

Ideal for outdoor activities, such as snap hook for keys and other various applications.

The hooks are constructed so that the main support of the body is equal to the longitudinal side. Therefore, the carbine largest capacity in the longitudinal load.

!!! DEFINITELY NOT BE USED TO HANG !!!

TECHNICAL DATA

	51200	51201
Dimensions:	6mm x 60mm	8mm x 80mm
Load capacity (strength) - longitudinal:	0,784 kN	1,568 kN
Weight:	9 g	25 g
Max. opening of hook:	15 mm	18 mm

MAINTENANCE

The carbiners do not need any special care. In the field, it is important not to expose the carbine unnecessarily dirt (don't lie is dust and sand). Dirty carbiners can be cleaned with a cloth and lukewarm water. Clogged lock that is malfunctioning, it is necessary to clean mechanically (e.g. brush), and if necessary easily and carefully lubricated. Excessive lubrication would help capture impurities. Wet carbiners dry in a gentle heat. Seawater can at long exposure disrupt material carbiners. So if carbiners come into contact with salt, wash it well with clean water.

WARNING

Don't use damaged, broken, cracked carbiners, this could lead to injury or other accidents caused by a defect in the carbiners.
